

Remember when the family all sat around the living room to watch their favorite shows? In today's society we have segmented the family based on personal interests. What if there was a way to bring the family room back into play. What if everyone could access digital information and entertainment from a media computer right in your entertainment center. Remember how much fun having quality family time was? It's available again with Microsoft® Media Center Edition 2005 and PC Wholesale.

- ★ Watch and record television. Record up to 3 shows at the same time with the right configuration.
- ★ Catalog and store CD's and MP3's and access them with a remote. Listen to streaming FM radio.
- ★ Share family photos and videos. Create lasting memories with digital media displayed on TV.
- ★ Record and then burn DVD's of your favorite shows for your home media library.
- ★ Check email and surf the net right in the family room on your television.
- ★ Listen to your favorite music while working on family projects on your computer
- ★ Play the latest computer games together. The digital experience will create hours of fun.
- ★ Enjoy HD-TV right from your media center computer. Computing never looked so good.
